PROCESSED FOOD: TODAY'S #1 HEALTH THREAT

21ST CENTURY LIFESTYLE: LOTS OF STRESS AND NO TIME

100 YEARS AGO

All food was organic. Vegetables grew from the earth. Fruit was picked directly from the tree. And farmers actually farmed. Pure, nutrient-dense foods were abundant and chemically-preserved foods were almost non-existent. Food was fresh. The soil was filled with minerals. The water was pure.

WE ARE CRAZY BUSY

We live in fast forward mode and there seems to be no time for anything. We are consumed by texts, emails, social media, work, bills, and responsibilities. And the people who may have it the toughest of all are busy moms. They care for the family and never seem to have time for themselves. Does it ever feel like you need an extra 2 or 3 hours in your day? Does it ever feel like you are running on empty? Does it ever feel like you need more time and energy?

- No time and energy for family
- No time and energy for friends
- No time and energy for working out
- No time and energy to cook

FAST FORWARD TO TODAY

Our food is filled with artificial colors, flavors, sweeteners, binders, fillers, hormones, pesticides, irradiated ingredients, and now, genetically-modified ingredients. And, according to medical experts, this "franken-food" is confusing our bodies and causing health issues that are preventable.

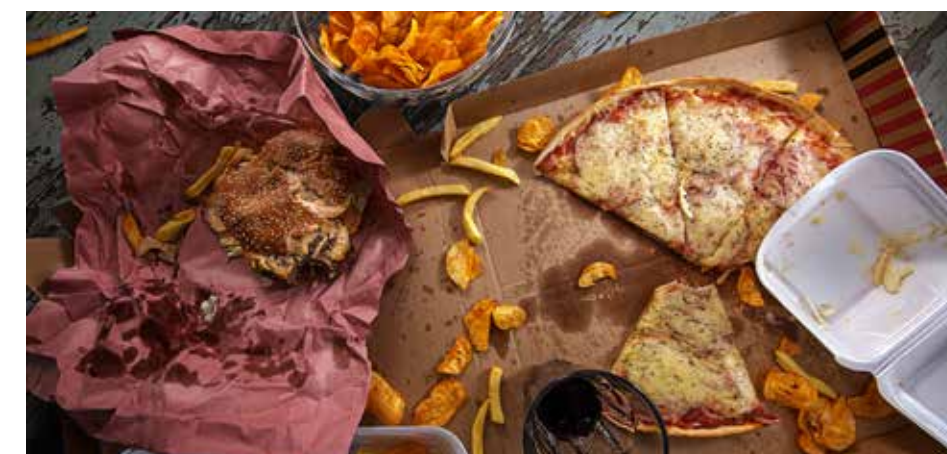

- According to the American Cancer Society, **60% of all cancer is preventable**
- According to the American Heart Association, **80% of all heart disease is preventable**
- According to the Archives of Internal Medicine, **90% of all diabetes is preventable**

AND WHEN IT COMES TO EATING

We are forced to make compromises of convenience. The food that is the fastest and the cheapest is almost always filled with chemicals and devoid of real nutrition. The statistics are frightening!

- **20% of Americans will eat a meal in a car today**
- **25% of all Americans will eat at least one fast food meal today**
- **Americans will eat 31% more packaged food than fresh food today**
